

Room with a view

What better way to transport passengers than onboard a rapid, safe and comfortable helicopter? The AS350 B3 encompasses all of these qualities to accommodate travelers in any geographic region under all climatic conditions.

Powered by an 847 shp - 632 kW TURBOMECA ARRIEL 2B engine, the AS350 B3 has an excellent high cruise speed of 140 kts - 258 Km/h, a state of the art technology (FADEC, VEMD), and a wide range of optional mission equipment. All these innovations have been fitted to free the pilot to better perform the mission in optimal safety conditions. The design of the AS350 B3 enables ease of maintenance for increased availability.
