## An efficient Police platform in the sky

The AS350 B3 performs a wide variety of law enforcement missions: surveillance, command and control, search and rescue, transport, border patrol and aerial support to ground operations. Able to perform in high and hot environments, the AS350 B3 also offers excellent visibility, a pilot friendly ergonomic cabin and an exceptional endurance. The open cockpit concept and low vibration level enable the installation of all the equipment and avionics necessary to create fully integrated law enforcement instrument panels and tactical consoles.
