

EUROCOPTER
EC135

Corporate

The elegant interior design with stylish seats and panelling conveys an exclusive ambience.

Luxurious materials and carefully crafted fittings enhance the low noise and vibration levels to create a pleasant and professional atmosphere. Roomy seats upholstered in

selected leather are an option in the business and VIP versions. Lockers and drawers for documents or other business needs are also available. Generous lighting systems with a spotlight for each passenger are included as standard.

The EC 135 delivers the highest standards.

EC 135 for Corporate and VIP operations

Whatever the task, the light twin EC 135 meets it in a professional manner. The helicopter's bearingless main rotor and innovative Fenestron tail rotor system offer excellent manoeuvrability and an exceptionally smooth and fast ride.

The EC 135's high set main rotor and the shrouded tail rotor enhance safety for passengers and ground personnel.

And when it comes to accessibility, the oversized side-sliding doors enable passengers to easily board and exit.

In addition, the helicopter's rear clamshell doors make luggage storage simple.

The EC 135 offers unsurpassed external visibility during flight – offering passengers an extra-ordinary view.

The EC 135 provides an outstanding work environment. In the VIP version there is ample room for five passengers or as a corporate shuttle it can take up to seven plus pilot. The standard version comes in a six-passenger configuration.
